

INVITATION

We warmly invite you to join us for the **EBiSC Focus Session & Meet-up Hub** at the ISSCR2016 Annual Meeting in San Francisco, USA

This will be the perfect opportunity to

- Discover the EBiSC iPSC Catalogue (<https://cells.ebisc.org>)
- Share our experience in establishing an international iPSC bank
- Learn more about the EBiSC approach to iPSC Cryopreservation, Automation, Quality Assurance, Banking, Data management & the overall Supply Chain
- Explore how EBiSC can meet your current research needs and facilitate future collaborations.

Meet you on: 22 June 2016, 09:00-12:00 for our EBiSC Focus Session

23 June 2016, 12:15-13:00 at the EBiSC Meet-Up Hub 2 in the Exhibition Hall

ISSCR2016 venue: Moscone West, 800 Howard Street, San Francisco

www.ebisc.eu

The “European Bank for induced pluripotent Stem Cells”

EBiSC enables academic & commercial scientists to access

QUALITY-CONTROLLED, DISEASE-RELEVANT, RESEARCH-GRADE IPSC LINES, DATA AND CELL SERVICES

for use in disease modelling and other forms of pre-clinical research.

WELCOME TO THE EBiSC CATALOGUE !

<https://cells.ebisc.org>

The initial collection of iPSCs available from the catalogue has been generated from a wide range of donors representing either specific disease backgrounds or healthy control donors.

The EBiSC catalogue has been created by the EBiSC consortium - a public-private partnership project of 27 organisations, comprising pharmaceutical companies who are members of the European Federation of Pharmaceutical Industries and Associations (EFPIA), small & medium-sized enterprises and academic institutions. EBiSC is supported by the Innovative Medicines Initiative (IMI).

More information on the project & consortium can be found at:

www.ebisc.eu
