Cell Line Information Pack (CLIP)

Cell line name	STBCi275-A

Purpose

The purpose of this Cell Line Information Pack (CLIP) is to communicate cell line specific information to potential users of the cell line, and to confirm that a User has received it upon the purchase of an EBiSC cell line.

Information

The CLIP may provide a variety of types of information related to an individual cell line. Of particular importance are Third Party Obligations (TPOs), which are ethical or legal obligations of a Depositor related to the use of the cell line. TPOs may impose ethical or legal limitations on the ability of a User to use the cell line, or require steps to be taken before it can be used. TPOs are likely to be:

- Obligations under license to an intellectual property rights (patent) holder, or
- Restrictions on use imposed by the donor of the primary tissue from which the cell line was made.

Third Party Obligations: donor consent provisions

Restrictions contained in the donor consent forms
The Material shall not be:
• sold to anyone;
• transplanted into any human being (for example, to treat a disease); or
• used to create egg or sperm cells (gametes), or embryos.
The User should consider returning incidental findings if they are clinically significant and actionable, in line with best practice and with further analysis to verify the finding where this is appropriate.
DNA sequencing can only be performed for research into donors specified condition. Material shall not be sold, transplanted into any human being or used to create egg or sperm cells (gametes) or embryos. The material shall not be used for direct exploitation. For the purposes of this, Direct exploitation means to develop for commericalization or to commercialize the Material.

Third Party Obligations: IP or license provisions

iPS-AJ: This EBiSC Cell line was generated under the technology disclosed in patents related to iPS cells which are owned by Kyoto University and are licensable from iPS Academia Japan., Inc.("iPS AJ"). Commercial user (for-profit entity) acknowledges that, prior to receipt and use of this EBiSC Cell line, such commercial user needs to have an appropriate patent license from iPS AJ even for its research use. Academic user (academic or not-for-profit entity) acknowledges that such academic user does not need a patent license from iPS AJ for its research use, provided, however, that when such academic user uses this EBiSC Cell line for other than its independent research use, such academic user acknowledges that the academic user might need to obtain an appropriate patent license from iPS AJ. For inquiries to iPS AJ, please contact at license@ips-ac.co.jp.

Other information

Any publications or public dissemination of results using EBiSC iPSCs should be accompanied by the following acknowledgement: "The EBiSC Bank acknowledges University of Oxford as the source of the human induced pluripotent cell line STBCi275-A which was generated with support from the EBiSC project. The EBiSC has

received support from the Innovative Medicines Initiative (IMI) Joint Undertaking (JU) under grant agreement n°115582 and from the IMI-2 JU under grant agreement No 821362, resources of which are composed of financial contribution from the European Union's Seventh Framework Programme (FP7/2007-2013), European Union's Horizon 2020 research and innovation programme and EFPIA."

Restrictions contained in the StemBANCC Project Agreement
The Material shall not be used for Direct Exploitation. For the purposes of this Appendix 2, "Direct Exploitation" means to develop for commercialization or to commercialize the Material.
