

Cell line name	UKBi007-A
----------------	-----------

### Purpose

The purpose of this Cell Line Information Pack (CLIP) is to communicate cell line specific information to potential users of the cell line, and to confirm that a User has received it upon the purchase of an EBiSC cell line.

### Information

The CLIP may provide a variety of types of information related to an individual cell line. Of particular importance are Third Party Obligations (TPOs), which are ethical or legal obligations of a Depositor related to the use of the cell line. TPOs may impose ethical or legal limitations on the ability of a User to use the cell line, or require steps to be taken before it can be used. TPOs are likely to be:

- Obligations under license to an intellectual property rights (patent) holder, or
- Restrictions on use imposed by the donor of the primary tissue from which the cell line was made.

#### Third Party Obligations: donor consent provisions

Donors of the cell line material have the right to withdraw from the consent therefore they are able to request that either:

- a) The material will be submitted anonymised and all identification data will be destroyed, which means that any connection between the donor and collected medical and scientific data will be removed or,
- b) All material and personal data will be destroyed.

#### Third Party Obligations: IP or license provisions

iPS-AJ: This EBiSC Cell line was generated under the technology disclosed in patents related to iPS cells which are owned by Kyoto University and are licensable from iPS Academia Japan., Inc. ("iPS AJ"). Commercial user (for-profit entity) acknowledges that, prior to receipt and use of this EBiSC Cell line, such commercial user needs to have an appropriate patent license from iPS AJ even for its research use. Academic user (academic or not-for-profit entity) acknowledges that such academic user does not need a patent license from iPS AJ for its research use, provided, however, that when such academic user uses this EBiSC Cell line for other than its independent research use, such academic user acknowledges that the academic user might need to obtain an appropriate patent license from iPS AJ. For inquiries to iPS AJ, please contact at [license@ips-ac.co.jp](mailto:license@ips-ac.co.jp).

The depositor has used reprogramming methods for the derivation of the Material, which are subject to IP-rights of third parties. The depositor has the right to use and transfer the materials for research use only and hence according the iPS Academia licence policy, does not require a licence. The depositor clearly states that is it the responsibility of the user to obtain the freedom to operate on the Material for his respective purpose of use, which includes negotiating with any third party about a licence for commercial purpose.

### Other information

Any publications or public dissemination of results using EBiSC iPSCs should be accompanied by the following acknowledgement: "The EBiSC Bank acknowledges Universitätsklinikum Bonn as the source of the human induced pluripotent cell line UKBi007-A which was generated with support from the EBiSC project. The EBiSC has
