

Cell Line Information Pack (CLIP)

Cell line name	WTSli198-A
Depositor cell line name	HPSI0414i-fuai_1
ECACC Catalogue No.	66540433

Purpose

The purpose of this Cell Line Information Pack (CLIP) is to communicate cell line specific information to potential users of the cell line, and to confirm that a User has received it upon the purchase of an EBiSC cell line.

Information

The CLIP may provide a variety of types of information related to an individual cell line. Of particular importance are Third Party Obligations (TPOs), which are ethical or legal obligations of a Depositor related to the use of the cell line. TPOs may impose ethical or legal limitations on the ability of a User to use the cell line, or require steps to be taken before it can be used. TPOs are likely to be:

- Obligations under license to an intellectual property rights (patent) holder, or
- Restrictions on use imposed by the donor of the primary tissue from which the cell line was made.

Third Party Obligations: donor consent provisions

The Material shall not be used for any purposes resulting in the placing in a woman a human embryo which has been created otherwise than by fertilization.

The User will not make any attempts to identify the original donors of the Material. User agrees to remove any data mapping to the Y chromosome (including sequencing reads, genotypes etc.) before making genetic or genomic data available to third parties. Once this has been done, data may be made available for biomedical research in an open access fashion, permitting redistribution of derived data sets.

User agrees that in any transfer it makes to a third party of any derivatives, modifications or other materials derived from the Original Material, in all such cases containing any of the genetic material of any of the Original Material, User shall include terms that bind legally the transferee and successive transferees in receipt of any of that genetic material to comply with the donor protection provisions in the paragraphs above.

Third Party Obligations: IP or license provisions

Life Tech and successors in title ("LTC") – provider of Cytotune kit used to make iPSCs. Applicable LULL.

Limited Use Label License No: 518 CytoTune™ Technology for Products

Notice to Purchaser: This product is authorized for reprogramming methods that involve or pertain to the preparation of iPSC cells or related cells. The purchase of this product conveys to the purchaser the limited, non-transferable right to use the purchased amount of product to perform internal use and for educational purposes. No right to resell this product or any of its components, or iPSC cells or related cells generated by use of the product, or derivatives thereof (hereafter "the Materials") is conveyed expressly, by implication, or by estoppel. For clarity, purchasers have the right to use third party service providers for generating iPSC cells and derivatives for the benefit of such purchasers. Purchasers can deposit the Materials with not-for-profit repositories ("Repositories") and transfer cells to not-for-profit research entities (not affiliated with a for-profit organisation) for their internal research. Such recipient Repositories and not-for-profit research entities are allowed to distribute the Material not-for-financial gain to other users for their internal research.

Cell Line Information Pack (CLIP)

Cell line name	WTSli198-A
Depositor cell line name	HPSI0414i-fuai_1
ECACC Catalogue No.	66540433

If the Materials are transferred to other users in accordance with the terms of this label license accompanying the product (hereafter “Label License”), the transferring party should notify recipients of such Materials of these terms by transferring a copy of the Label License to the recipients.

To obtain commercial rights for the sale of the Materials or for a fee-for-service generation of the Materials other than as allowed in paragraph 1 above, purchasers are requested to contact Dनावेक Corporation at cytotune@dnavec-corp.com. For all other commercial applications relating to the use of the Materials, purchasers might be required to contact iPS Academia Japan. Customers may contact iPS Academia Japan either directly at license@ips-ac.co.jp or through Dनावेक Corporation.

Other information

The EBISC Bank acknowledges Welcome Trust Sanger Institute as the source of the human induced pluripotent cell line which was generated under the Human Induced Pluripotent Stem Cell Initiative funded by a grant from the Welcome Trust and Medical Research Council, supported by the Welcome Trust and the NIHR/Welcome Trust Clinical Research Facility.
